MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Student Name: Sanket Mali
B.Tech – Computer Science (2023–2027)
Date of Birth: Sep 18 ,2025

Education

MPSTME, NMIMS University **2023 - 2027**
B. Tech in Computer Science
CGPA: 3.43/4.00

R.C. Patel Junior College **2021 - 2023**
HSC: 79.50

R.C. Patel English Medium Secondary School **2021**
CBSE: 87.40

Projects

WanderLust (Airbnb Clone) – 2025
Developed WanderLust, a full-stack Airbnb-style platform to simplify property browsing and booking (Situation). The objective was to design a scalable and secure web application supporting listings, bookings, and user authentication (Task). Built a dynamic frontend using EJS, HTML, CSS, and JavaScript, and implemented the backend using Node.js and Express.js with RESTful APIs, MVC architecture, authentication, and MongoDB integration (Action). Successfully created a functional end-to-end booking system with structured routing, secure middleware, and efficient data management, demonstrating strong full-stack development capability (Result).

Library Management System (Multi-Library Network) – 2025
Designed a centralized database system to manage multiple libraries under a unified platform (Situation). The goal was to streamline book tracking, member management, and inter-library operations efficiently (Task). Developed the system using PL/SQL with normalized schema design, stored procedures, triggers, and automated fine calculation logic, along with support for inter-library book transfers and centralized reporting (Action). Improved operational efficiency, ensured data consistency across libraries, and enabled structured transaction handling within a scalable database system (Result)

Employee Directory App – 2024
Built and deployed a cloud-based Employee Directory application to manage employee data in a scalable environment (Situation). The objective was to implement secure hosting and efficient cloud-based storage architecture (Task). Deployed the application on AWS EC2, integrated AWS S3 for asset storage, and utilized DynamoDB for NoSQL data management while applying cloud deployment best practices and instance optimization (Action). Achieved reliable cloud deployment with seamless AWS service integration, strengthening practical knowledge of real-world cloud architecture and infrastructure management (Result).

Smart Environmental Monitoring System (DA-IoT) – 2024
Developed a low-cost environmental monitoring system to address indoor air quality and safety concerns (Situation). The goal was to monitor temperature, humidity, and CO_2 levels in real time and provide alerts for unsafe conditions (Task). Integrated ESP32 with DHT22 and MQ135 sensors, implemented cloud logging via ThingSpeak, and configured real-time threshold alerts using Blynk IoT (Action). Delivered a scalable IoT solution suitable for homes and institutions, enabling proactive environmental monitoring and cost-effective deployment under ₹1000 (Result).

Internships

Technook – Nov 2023 – Jan 2024
Full Stack Software Developer Intern
Worked on designing and implementing a full-stack Quiz Portal system, contributing to both frontend and backend development. Developed interactive and performance-optimized web components using HTML, CSS, and JavaScript to enhance usability and responsiveness. Engineered backend workflows using Magic, Hyperlambda, and MySQL to manage application logic and database operations efficiently. Collaborated within an agile team environment, analyzing requirements and translating them into functional and scalable features.

Student Name: Sanket Mali
B.Tech – Computer Science (2023–2027)
Date of Birth: Sep 18 ,2025

Certifications

- **Foundation of Digital Marketing and E-commerce** – Google (Coursera) | Oct 2023
- **Cloud Computing Basics (Cloud 101)** – LearnQuest (Coursera) | Dec 2023
- **Crash Course on Python** – Google (Coursera) | Dec 2023
- **Introduction to Git and GitHub** – Google (Coursera) | Jun 2024
- **AWS Cloud Technical Essentials** – AWS | Jun 2024
- **Introduction to Information Technology and AWS Cloud** – AWS (Coursera) | Jun 2024
- **Providing Technical Support for AWS Workloads** – AWS (Coursera) | Jul 2024
- **Developing Applications in Python on AWS** – AWS (Coursera) | Aug 2024
- **Harnessing the Power of Data with Power BI** – Microsoft (Coursera) | Aug 2024
- **Preparing Data for Analysis with Microsoft Excel** – Microsoft (Coursera) | Sep 2024

Publications

Advanced Database Testing and Verification Using Automated Tools and Vulnerability Analysis
Presented at the 4th IEEE DELCON 2025 – International Conference on Recent Smart Technologies in Engineering for Sustainable Development, Jamia Millia Islamia, New Delhi (Oct–Nov 2025).
Proposed an automated framework for database testing using symbolic execution, mutation-based testing (DBGriller), and semantic analysis to detect SQL injection vulnerabilities. The solution enhances database reliability, strengthens security, and supports CI/CD pipeline integration.

CORE SKILLS

Technical Skills
Languages: Python, JavaScript, Java, C++, SQL
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, EJS
Backend: Node.js, Express.js
Databases: MySQL, MongoDB, PL/SQL
Cloud: AWS (EC2, S3, DynamoDB)
Analytics: R, MATLAB, Power BI
Tools: Git, GitHub, SolidWorks, AutoCAD
Concepts: OOP, Data Structures, OS, DBMS, Computer Networks, Distributed Systems

Soft Skills
Interpersonal Skills: Effective Communication, Active Listening, Professional Etiquette
Team & Collaboration: Agile Collaboration, Teamwork, Cross-functional Coordination
Analytical Abilities: Problem Solving, Critical Thinking, Requirement Analysis
Work Ethic: Time Management, Task Prioritisation, Accountability
Personal Traits: Adaptability, Quick Learning, Attention to Detail

Achievements and Positions of Responsibility

- Active Member, Computer Society of India (CSI) – Participated in technical workshops, seminars, and collaborative events (2024–Present).
